Expanding Research and Evaluation Designs...for QII

Carolyn M. Clancy, MD
Director, AHRQ
September 13, 2005

1. Identify problem(s) and review information to determine extent
2. With an emphasis on risk and protective factors, review information—both from fields outside prevention and from existing prevention intervention programs
3. Design, conduct, and analyze pilot studies and replication trials of the prevention intervention program
4. Design, conduct, and analyze large-scale trials of the prevention intervention program
5. Facilitate large-scale implementation and ongoing evaluation of the prevention intervention program in the community

Feedback Loop

CLOSING THE GREAT DIVIDE
22nd Annual RTC Conference
Presented in Tampa, March 2009

Macro Policy

Funding

Putting it into Practice—Prevention Delivery System
  - General Capacity Use
  - Innovation-Specific Capacity Use

Supporting the Work—Prevention Support System
  - General Capacity Building
  - Innovation-Specific Capacity Building

Distilling the Information—Prevention Synthesis & Translation
